

The Typical Single Mother Would Have to Spend 70% of Her Income to Cover the Full Cost of Child Care

Child Care Costs for an Infant and a School-Age Child as a Percentage of Family Income

* Cost of care in California in 2014 (full-time for an infant and part-time for a school-age child). This cost is based on counties' median cost of care in licensed centers weighted to reflect each county's population of infants and school-age children.
